

Learn to use the Internet for Free!!

West Central Community Action & Senior Service of America Digital Inclusion Program

INTERNET MADE SIMPLE FOR SENIORS

The Digital Inclusion initiative is a free program to all adults 55 or older. It's goal is to help older adults who do not know how to use a mouse to be able to-and want to-use the Internet for their own reasons at libraries, senior centers, and other locations in their community that provide free access to the Internet. As these older adults increase their use of the Internet, we hope to reduce their isolation and promote lifelong learning, which may lead to improvements in their physical and emotional well-being.

West Central Community Action
